

COLIATY DELIVERY NETWORK

Which cities sit where their hub says they should

A hub covers a compact service area, so a city plotted far from the rest of its hub is usually a geocoding mistake rather than a real outlier. Distances are measured from each hub's **median** position, so a few already-wrong cities cannot drag the reference point toward themselves.

444 deliverable cities	18 hubs	63 beyond 120km from centre	46 no coordinates yet
----------------------------------	-------------------	---------------------------------------	---------------------------------

Distance is a prompt, not a verdict. Some flagged cities are genuinely remote — Dakhla really is 650km from the Laayoune hub, and Figuig really is out on the Algerian border. Others are plainly wrong: **Inzegane** is plotted on Casablanca's coordinates when Inezgane borders Agadir. Each one needs a human call.

Grey dots are cities within tolerance; red dots are flagged. Numbered crosshairs mark each hub's median centre, and every dashed line runs from a hub to one of its outliers.

1 AGADIR 46 10	7 OUARZAZAT 18 5	13 Kenitra 16 1
2 BENIMELLAL 66 9	8 ERRACHIDIA 14 2	14 Khemisset - Tifelt 8 1
3 OUJDA 50 9	9 Meknes 23 2	15 Settat - Berchid 13 1
4 LAAYOUNE 14 8	10 SAFI 18 2	16 TANGER 33 1
5 FES 32 5	11 CASABLANCA 18 1	17 AL HOCEÏMA 11
6 MARRAKECH 36 5	12 EL JADIDA 15 1	18 RABAT 13

Each entry reads: number, hub, cities, **flagged**.

Cities to check

All 63 cities sitting more than 120km from their hub's centre, worst first. **Source** is where the coordinates came from — nominatim results are the likelier mistakes, since that lookup only had a name to work from.
